| Short description:                |                          | According to the pilot's statement he lost directional control during cross-<br>wind landing, the aircraft veered to the right, the left wing dropped and as<br>a result the left balance rod fixed on the outer part of the left aileron<br>caught the grass. In the final stage, the outer part of the left aileron was<br>torn off and this part of the wing was deformed. |
| Remarks:                          |                          | An investigation has been opened by the Air Accidents Investigation Insti-<br>tute AAII, Czech Republic                                                                                                                                                                                                                                                                       |
