Notification

We inform you about a serious incident of an aircraft registered in United States of America (USA) which occurred in Antioch, Georgia, United States of America (USA).

Place, date: Antioch, Georgia United States, 18 January 2024

Aircraft

Registration Mark: N780PA
Type: SwissDrones SDO 50 V2
Operator: Phoenix Air Unmanned LLC
Owner: Phoenix Air Unmanned LLC

Flight:

Flight rules: *(Unknown)*
Type of operation: *(Unknown)*
Point of departure: *(Unknown)*
Point of landing: *(Unknown)*

Damage:

Crew: None
Passengers: None
Thirds: None
Aircraft: Substantially damaged
Ground: None

Short description:

While performing UAS operations, the pilot began to receive fuel pump alarms. The remote pilot brought the aircraft in to land where the UAS lost rotor RPM, which resulted in a hard landing on a grassy field and substantial damage to the UAS.

Remarks:

The National Transportation Safety Board NTSB has opened an investigation (<http://www.nts.gov>).
